

Professional Equalizer Peel System

Suitable for all skin types (Fitzpatrick Types I-V)
Professional use only under medical supervision (i.e. physician or licensed professional)
4-step customizable peel system: Peel Prep, Equalizer Peel, Peel Booster, Peel Neutralizer
9 vials per box (i.e. 9 vials of Equalizer Peel, 9 vials Peel Booster, etc.) Net Contents: 108 ml

- > Stimulates increased cell turnover, skin rejuvenation and accelerates healing to reveal more beautiful, radiant skin
- > Multiple layer applications of peel and booster can increase desired aesthetic results through a series of 1-6 treatments
- > Peel System helps improve the appearance of problem and photoaged skin by deeply cleansing pores and removing skin scale while smoothing the skin to help reduce the appearance of fine lines, wrinkles and hyperpigmentation
- > See “Epionce Peel System Handbook” for complete Peel System description and usage instructions

COMPLEMENTARY FACIAL PRODUCTS FOLLOWING PEEL PROCEDURE

Epionce Skin Barrier Repair Kit

INGREDIENTS

Peel Prep: Alcohol Denat., Acetone

Equalizer Peel: Alcohol Denat., Salicylic Acid (28%), Salix Alba (Willow Bark) Extract (6%), Allium Fistulosum (Onion) Bulb Extract (2%)

Peel Booster: Enriched Fraction of Apple Extract (50%), Water (Aqua)

Peel Neutralizer: Water (Aqua), Potassium Nitrate (0.5%)

Skin Barrier Repair Kit

Recommended for all skin types following invasive and non-invasive procedures
Fragrance Free / Paraben Free / Non Comedogenic
Contains Milky Lotion Cleanser, Medical Barrier Cream, Active Shield Lotion SPF 30+
30 ml each / Net Contents: 90 ml

- > Using the Skin Barrier Repair Kit immediately post-procedure (up to 72 hours) enhances the healing process, helps reduce inflammatory factors in the skin and quickly up-regulates barrier function
- > Milky Lotion Cleanser smoothes and calms the skin without unnecessary dryness or irritation
- > Medical Barrier Cream is formulated without topical sensitizers and preservatives, ideal for post-procedure use
- > Active Shield Lotion SPF 30+ helps protect vulnerable post-procedure skin from damaging UVA/UVB exposure
- > Recommended as the ideal treatment immediately following disruptive procedures such as laser resurfacing, chemical peels and microdermabrasion

COMPLEMENTARY FACIAL PRODUCTS POST-PROCEDURE

Patient should return to regular Epionce skin care program 72 hours post-procedure, or as recommended.

INGREDIENTS

Refer to previously noted Phase 01, Phase 04 and Phase 05 ingredient lists.
